

Super Color

Instructions

# *Ink Jet Bumper Stickers*

Make Water Resistant BUMPER STICKERS with your color ink jet printer.

Super Color Ink Jet Bumper Stickers are manufactured from a special In Jet Coated Vinyl Bumper Sticker Material. Print High Resolution Photographs and Graphics. After printing ... Let the ink set for 10 to 12 hours. Place on the bumper of your car. Bumper Stickers are easy to remove thanks to special formulated removable adhesive.

Store unused product in the original package.  
Keep in dry, cool place. Ink Jet Coated Materials may be sensitive to humidity.

The "print surface" is the "coated surface" of the sheet.  
While you may want to experiment with various print settings, we have found that the best output is usually obtained when you set your printer to  
**PLAIN PAPER ~ HIGHEST RESOLUTION**

Print ONE SHEET at a time.  
Allow ink to dry and set fully.

To determine the print surface, the print side of the sheet is the "whitest side of the sheet. You may want to slightly remove the Bumper Sticker material from the backing paper. The "Print Surface" is the thin Vinyl Side of the sheet. The "liner" is the back of the sheet. If the sheet has a "notch," when the "notch" is in the top right-hand corner position, you are looking at the side of the sheet on which the image is to be printed.

Suggestion ... Print THREE Bumper Stickers per sheet.  
After printing, CUT the sheet into three sections cresting three bumper stickers

~ IMPORTANT NOTICE ~

Super Color Ink Jet Bumper Stickers are water resistant. However it is normal for a small amount of ink to remain on the surface of the material. Since this ink may run slightly when wet, after printing we recommend that you spray with Super Color Ink Jet Over Coat (Sold Separately). Apply TWO light coatings to seal excess ink and add to the water resistant quality of this material. Be sure to allow the coating to dry after each "light" spray coating. Do not "flood" the material with the spray coating. Too much coating may cause the ink to run and damage the vinyl bumper sticker material.
