

SuperCal[®] FINGERNAIL DECALS

Thank you for purchasing SuperCal[®] Fingernail Decals. When you are ready to print, please set your printer to either "Plain Paper" or "Photo Quality" - "Highest Resolution." Test the settings and positioning of your image on less expensive plain paper prior to using the SuperCal[®] Decal Paper. Because settings vary with different printers, you may have to experiment to find the best setting for printing with your specific printer.

The SuperCal[®] Fingernail Decal System has two parts:

- 1) The SuperCal[®] Decal Paper
- 2) Magic (Medical Grade) Adhesive Sheet

Design your Fingernail Decal art using your favorite graphic software. If your design contains words, letters or numbers, when your design is completed, click on "mirror image." This will cause your design to "flip" in the horizontal mode. The words and design will appear on backward on the screen.

Make a test print of your design using plain paper.

When you are happy with the design, feed a single sheet of SuperCal[®] Decal Paper into your printer. After printing, let dry for at least 30 minutes.

Next, pick up the Magic Adhesive Sheet. Completely remove the liner from one side of the sheet. Place the exposed Magic Adhesive against the printed side of the SuperCal[®] Decal Sheet.

Once the adhesive sheet is in place, rub to remove air bubbles. Using a household scissors, cut around the image and then trim to size.

Remove the liner from the SuperCal[®] Decal, exposing the adhesive that is now coating your printed design.

Place the decal onto your fingernail, adhesive side down on your fingernail. Press in place.

Apply a little water to the decal using a damp cloth. Within a few seconds, the paper backing will slide off the decal.

Your design is now in place.

Enjoy.

Cut around image.

Trim to size

Separate Decal from liner.

Place Decal on Fingernail with adhesive side against the finger nail.

Wet Decal with damp cloth.

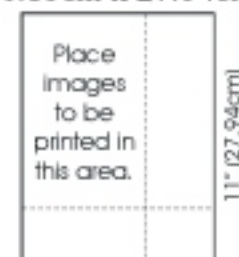

Slide off Paper Backing.

Design Tip

1. Create a New Document
2. Use Standard Settings of 8.5"x11" Portrait (21.59cm x 27.94cm)

8.5" (21.59cm)

3. Draw a vertical guideline 5.5" (13.97cm) from the left edge of the document.
4. Draw a vertical guideline 8.5" (21.59cm) from the top edge of the document.
5. Place all the images to be printed within the area to the left and above the guidelines.
6. Print with paper setting at normal 8.5" x 11" portrait (21.59cm x 27.94cm)
7. Test on plain paper BEFORE using SuperCal Decal Paper.

If images print properly in the top left hand portion of the plain paper sheet, they will print properly on the SuperCal Decal Paper.

Helpful Information

To Remove, wash with soap and water rubbing in a circular motion. You can also remove with nail polish remover. The adhesive coating used on the Magic Adhesive Sheet is a medical grade adhesive, similar to that used on adhesive bandages.
