

Thank you for purchasing Super Color Body Art Temporary Tattoos. When you are ready to print, please set your printer to "Photo Quality" - "Highest Resolution." Test the settings and positioning of your image on less expensive plain paper prior to using the SuperCal Body Art Tattoo Paper

The Super Color Body Art System has two parts:

- 1) The SuperCal Body Art Paper
- 2) Last Step Medical Grade Adhesive Sheet

Design your Body Art Tattoo using your favorite graphic software. When completed, click on "mirror image." This will cause your design to "flip" in the horizontal mode. The words and design will appear on the screen backwards.

Make a test print of your design using plain paper. When you are happy with the design, feed a single sheet of SuperCal Body Art Tattoo Paper into your printer. After printing, let dry for at least 30 minutes.

After the image has dried, cut out your design using a household scissors. Cut as close to the design as possible.

Next cut a rectangle or square out of the Last Step Special Adhesive sheet. Make sure it is large enough to cover the complete printed design.

Remove the face covering from the adhesive square exposing the adhesive. Place the printed design, printed side down onto the sticky surface. Rub the adhesive from around the edges of the Body Art Tattoo sheet. Press the Body Art Tattoo sheet firmly against the adhesive sheet. Press down on all sides.

Carefully separate the Body Art Tattoo sheet from the special adhesive sheet.

The Body Art Tattoo design is now covered with a thin adhesive film.

Position the Body Art Tattoo design on your skin, adhesive side down. Press firmly for about 10 seconds.

Wet the Body Art Tattoo with a wet cloth or sponge. In approximately 60 seconds, the backer paper will slide off leaving the Body Art Tattoo in place.

Carefully dab with a soft cloth.

Your Body Art Tattoo can be removed with soap and water.

Design Tip

1. Create a New Document
2. Use Standard Settings of 8.5"x11" Portrait (21.59cm x 27.94cm)

3. Draw a vertical guideline 5.5" (13.97cm) from the left edge of the document.
4. Draw a vertical guideline 8.5" (21.59cm) from the top edge of the document.
5. Place all the images to be printed within the area to the left and above the guidelines.
6. Print with paper setting of normal 8.5" x 11" portrait (21.59cm x 27.94cm)
7. Test on plain paper BEFORE using SuperCal Decal Paper. If images print properly in the top left hand portion of the plain paper sheet, they will print properly on the SuperCal Decal Paper.

Helpful Information

Do not wear Super Color Body Art Tattoos for more than two days. To Remove, wash with soap and water rubbing in a circular motion. Wash skin with soap and water after tattoo is removed. Even though the adhesive is medical grade, some people may experience reddening of the skin with the use of this product. If you notice skin irritation, remove the tattoo immediately and discontinue use. Applying baby oil to sensitive skin may help any mild irritation.
